Summary

Computer Science & Software Engineering student (GPA 3.7) with experience building and shipping full-stack web and mobile applications. Work ranges from AI-integrated mobile apps to deployed web tools. Also spent time in an enterprise IT environment at Debswana Diamond Company, rotating across four IT sub-departments and contributing to a 250-device Windows 11 rollout which built practical experience with Active Directory, Intune and large-scale corporate infrastructure.

Technical Skills

Languages: Python, JavaScript, Java, HTML5, CSS3
Frameworks & Libraries: React, React Native, Expo, FastAPI, Node.js, Express
Databases & Cloud: Firebase, Supabase, SQLite, Railway
AI & APIs: Google Gemini (google-genai)
Tools & Platforms: Git, GitHub, VS Code, Android Studio, Render
Enterprise IT: Microsoft 365, Active Directory, Microsoft Intune, VMware vCenter, Azure (fundamentals), Device Deployment, User Provisioning

Projects

brAInwave - AI Study Planner (Final Year Project)
Tech: React Native, Expo, Node.js, Firebase, Supabase, Python, FastAPI, Google Gemini, SQLite, Railway
GitHub: brAInwave

- Mobile app that generates personalised study schedules from uploaded syllabi, assignments, and deadlines
- Used Google Gemini to parse uploaded files and extract scheduling context, then produce structured weekly timetables
- Offline support via SQLite so plans are accessible without a connection
- Backend on Python/FastAPI deployed via Railway; Supabase for cloud storage, Firebase for auth

copus - MP3 to Opus/OGG Converter
Node.js, Express, ffmpeg, Multer, HTML, CSS, JavaScript
Live: copus-h8e4.onrender.com GitHub: copus

- Full-stack web app that converts MP3s to opus/ogg using ffmpeg, with drag-and-drop uploads and automatic cleanup after conversion
- Fixed cross-platform download issues on mobile browsers by switching from blob downloads to server-side file serving
- Deployed on Render with file type filtering, size limits, and CORS configuration

Experience

Debswana Diamond Company Jun 2025 – Jul 2025
IT Attaché (Internship) Orapa, Botswana

- Rotated across four IT sub-departments - Back-Office, Networks, Applications, and Desktops, supporting enterprise IT operations across corporate offices, schools, and mine sites
- Contributed to a company-wide Windows 10 to 11 upgrade rollout, personally handling ~50 of ~250 laptops, including scheduling via Teams, verifying cloud backups, clean OS installs, and software reinstallation
- Set up and deployed desktops, laptops, and AIO PCs - installed drivers, configured standard software packages, and verified devices were fully operational before handoff

- Managed devices in Active Directory and Microsoft Intune, including adding machines to AD groups for software deployment and tracking deployment status via service tags
- Troubleshot hardware and software issues including boot loops, domain connectivity failures, BitLocker problems, and printer faults - including on-site visits to mine sites and external schools
- Identified disorganization in the shared software repository and suggested restructuring with categorised folders and installation documentation to reduce deployment friction
- Gained exposure to VMware vCenter virtualization infrastructure and completed Microsoft Azure fundamentals study during the attachment

Leadership & Activities

Botswana International University of Science and Technology Aug 2022 – May 2024
Class Representative Palapye

- Main point of contact between a class of students and faculty - passed information both ways and made sure things didn't fall through the cracks
- Helped resolve disputes between students and occasionally between students and staff
